

Individual Figma Video Tutorial and Documentation Template

Individual Figma Video Tutorial and Document

SUBMITTED INDIVIDUALLY BY EACH STUDENT IN THE GROUP

Save File as pdf with file name **FirstNameLastInitial_FigmaTutorial.pdf** (e.g., JohnS_FigmaTutorial.pdf if your name is John Smith)

As part of this individual submission, you will create a Figma Tutorial on how to create a mobile app prototype using Figma. The video tutorial should be at least 10 minutes long, should show your face and voice and shared screen with Figma to illustrate and demonstrate key concepts and steps to create a mobile prototype. You may include any additional supplemental document/slides needed to supplement your video tutorial along with this document (see sections below).

Clearly state your name, student id and your project full name:

YourFirst and Last Name and student id

W26_3375_S1_G#_AppName (S1 for section 1, S2 for section 2, S3 for section 3, S4 for section 4)

The completed document must be submitted on blackboard and checked into the GitHub Repo as well (see Intro Document for GitHub Repo details and structure).

The Document Must Contain the Following Sections:

1. **Figma Tutorial Video Link:** Clearly provide the URL (leave the URL as is, do not replace it with any text), make the URL clickable. The video should be available/viewable with a link without needing me to login to any account. **You must double check that the URL is accessible at the time of your submission**
2. **Supplemental Document/Slides for your video tutorial:** You may include any supplemental summary/slides in addition to the video you created. You may include them in this section, or as a separate file as you see appropriate.
3. **AI Use Section (for video tutorial and supplemental document preparation):**
 - **Table of AI Tools and Specific Use:** It must contain a table showing tool name (with version number, and account type i.e., free vs. premium), and the specific use of the AI tool (e.g., Loveart AI, starter account free trial, Used for creating app LOGO).

AI Tool Name	Version, Account Type	Specific feature for which the AI tool was used

- **Value Addition:** What value did you add over and above what AI did for you.
- **Appendix:** Prompt history must all be saved in the appendix

Individual Figma Video Tutorial and Documentation Template

4. **Project Work Date/Hours Logs** (all logs must be entered as and when work is completed) for EACH STUDENT. Having smaller chunks more regularly is important. **Note that the work logs are for the project as a whole and not just for the Figma Tutorial. Include all work you have done since the project proposal.**

Creating broad logs with 10 hours and 12 hours in a day will be counted as inaccurate logging with insufficient granularity of work logs.

Instead create an entry for work done every day that you do the work.

Date	Number of Hours	Description of work done
Feb 3, 2026	2	Initial research on Topic XXX
Feb 5, 2026	1.5	Created a draft of questions for requirements gathering user study
Feb 8, 2026	2	Figma tutorial outline
Feb 12, 2026	3	Creating figma tutorial link and supplemental document

5. **References:** Any references you want to include as part of citation towards any part of project planning and execution.

The Grading Rubric for the Individual Figma video Tutorial and Document

Criteria	Grading
Figma Tutorial • Depth and complexity of material covered in the video • Clarity of explanation and clear presentation of the Figma demonstration, audio and video in the tutorial • Relevance and depth of supplemental document/slides to enhance the video tutorial • Video URL clear, clickable and accessible with a click without needing any additional login	6 points

Individual Figma Video Tutorial and Documentation Template

AI Use Section (for video tutorial and supplemental documentation) • What tools were used and specific purpose • Value Addition	2 points
Project Work Logs (includes all work towards group project, not just the tutorial) • The consistency of the work logs • The details and description of the work logs • The granularity of the work logs	3 points
Actual Work Completed Towards Project (includes all work towards group project, not just the tutorial) • Frequency and duration of work completed • Quantity and quality of work completed • Complexity of work done	4 points
