

Persona 1

- Age 30 male
- College student
- Not normally an active person but recently started to work out
- Often eats fast food because he felt cooking is way to time consuming
- Recently found out that his cholesterol levels are high
- Want to start cook for health and budget reasons
- Doesn't really use any social media

1. He recently downloaded a recipe app to learn how to cook
2. Because he usually eats at fast food restaurants, he's not used to spending a lot of time to cook so he looks up recipes that's easy and fast to prepare
3. The recipe app gives him a list of recipes, and he sorts them based on price to find one that isn't too expensive
4. He eventually settled on a ground beef recipe that seems simple to prepare and provides a good amount of protein for his workouts
5. He wants to compliment the meal with vegetables, so he also asks the app to look up vegetable recipes that would compliment this meal both flavor-wise and nutrition-wise
6. He found a beansprout recipe that he think he'll like and adds that to his menu
7. He then views the ingredient list and adds any ingredient he doesn't own to a shopping cart, and then uses the app to order them online to be delivered
8. He then prepares a big batch of food for 3 meals using the app to guide him on how to cook it
9. Afterwards he uses the app to rate the meal based on how much he liked the flavors
10. He repeats this process for several days, trying out a different meal each day and the app gradually learns the type of meals he likes based on his search specifications and rating

Persona 2

- 55 years old female
- Housewife
- Lives with her husband, children has recently graduated high school and moved out
- Used to cook nutritious meals for her children, does it less often nowadays
- Often browses social media to learn new recipes
- Interested in finding friends of likeminded hobbies

1. She opens the recipe app and checks out the home page page for the trending recipes.
2. She saves any ones she's interested in to a "try later" list before going to the community tab where she had joined a group filled with people with similar food preferences
3. She checks out the meals that other people had cooked and saves any recipe she thinks she'll like
4. The app then notifies her that a friend of her is planning to cook a difficult recipe and is looking for someone to help her cook
5. She agrees and the app notifies her friend and sets up a chat between them
6. After arranging the schedule, they agree to meet up on a later date. The app orders the ingredients and splits the bill between the two
7. The app also suggests food that might compliment the meal, though they decided against it
8. On the agreed day, they cooked the meal together. They also decided to record their cooking experience which the app automatically helps edit the video.
9. They uploaded the video to their community group with the app marking the video as a group effort
